# 417 CRAFTSMAN

This Mission style collection is accomplished in oak solids and veneers with walnut diamond inlay accents and authentic mission hardware throughout the collection. Using American red oak along with a warm deep-brown finish completes the look. Curvatures are designed into the back of the chairs as well as the top of the gathering table. The gathering table also offers additional shelving and storage within the table base. The functional server offers an array of storage for wine, stemware, flatware and dishware. The buffet and hutch provides an option for increased storage capacity while providing an authentic mission look. The scaling and attention to detail is evident throughout the collection, and will be an exceptional addition to any home.
